Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 29, 2012.

Populations do not reflect any changes after February 29, 2012. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency is not deducted from the HA acreage.

Most population estimates are direct counts and are not adjusted for animals not observed.

HA acreage totals are calculated based on designations made in the early 1970's.

Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.

1. Appropriate Management Levels, indicates estimated AML.
2. AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs created from other HAs will not have acres in the HA columns.
5. Jakes Wash become a jointly managed BLM HMA and FS territory with the White Pine Land Exchange, 2007.

1. Appropriate Management Levels, indicates estimated AML.
2. AML is reported as the maxium number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs created from other HAs will not have acres in the HA columns.

Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 28, 2011.

Populations do not reflect any changes after February 28, 2011. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency is not deducted from the HA acreage.

Most population estimates are direct counts and are not adjusted for animals not observed.

HA acreage totals are calculated based on designations made in the early 1970's.

1. Appropriate Management Levels, indicates estimated AML.
2. AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs created from other HAs will not have acres in the HA columns.
5. Jakes Wash become a jointly managed BLM HMA and FS territory with the White Pine Land Exchange, 2007.

MONITOR (All claimed - not mapped)	NV0617						

Never designated - Managed as interim HMAs within Spring Mountain HA.

6. Murphys Wash became a BLM HA with the White Pine Land Exchange, 2007.
7. Butte and Wilson Creek HAs/HMAs were created from other HAs and migrated into different HMAs.
8. Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

1. **Appropriate Management Levels**, *indicates estimated AML*.
2. AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs managed within the Bible Springs Complex include: Bible Springs, Four Mile, and Tilly Creek.
5. Muddy Creek HMA is comprised of areas joined together for management purposes (Muddy Creek & Sinbad horse HAs); Price RMP, 2008.

HERD AREAS (HAs) - AREAS NOT MANAGED FOR WILD HORSES AND BURROS

HERD AREA NAME	Herd Code	HERD AREA		Acres Transferred from BLM	Estimated Horse Pop	Estimated Burro Pop	Last Gather Mo/Year

Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 28, 2010.

Populations do not reflect any changes after February 28, 2010. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency is not deducted from the HA acreage.

Most population estimates are direct counts and are not adjusted for animals not observed.

HA acreage totals are calculated based on designations made in the early 1970's.

1. Appropriate Management Levels, indicates estimated AML.
2. AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs created from other HAs will not have acres in the HA columns.
5. Jakes Wash become a jointly managed BLM HMA and FS territory with the White Pine Land Exchange, 2007.

1. Appropriate Management Levels, indicates estimated AML.
2. AML is reported as the maxium number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs created from other HAs will not have acres in the HA columns.
5. Heath Creek-Sheepshead (OR0004) was combined with Sheepshead (OR0016) in the Southeast Oregon RMP, Sept. 2002.
6. Coyote Lake was combined with Alvord Tule Springs in the Andrews Management Unit RMP, 2005.

1. **Appropriate Management Levels**, *indicates estimated AML*.
2. AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. HMAs managed within the Bible Springs Complex include: Bible Springs, Four Mile, and Tilly Creek.
5. Muddy Creek HMA is comprised of areas joined together for management purposes (Muddy Creek & Sinbad horse HAs); Price RMP, 2008.

HERD AREAS (HAs) - AREAS NOT MANAGED FOR WILD HORSES AND BURROS

HERD AREA NAME	Herd Code	HERD AREA		Acres Transferred from BLM	Estimated Horse Pop	Estimated Burro Pop	Last Gather Mo/Year
		BLM Acres	Total Acres

Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

HA statistics are a reflection of each state's current estimated population information as of February 28, 2009.

Populations do not reflect any changes after February, 2009. (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels, the numbers displayed represents the upper limit.

Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

Acres have been calculated using current digitized (GIS) maps.

Most Recent Year @ AML is the last time AML was achieved on the HMA.

Acres transferred from BLM to another agency is not deducted from the HA acreage.

Most horse population estimates are direct counts and are not adjusted for animals not observed.

HA totals are calculated based on designations made in the early 1970's. HMAs created from other HAs will not have acres in the HA columns and are not counted in t

the HA totals.

Herd Management Areas and Herd Areas have been placed in separate tables by state.

Herd Area statistics are a reflection of each state's current estimated population information as of February 29, 2008.

Populations do not reflect any changes after February, 2008. (i.e. foal crops or gathers).

BLM policy is to establish AML as a range with upper and lower levels, the numbers displayed represents the upper limit.

Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

Acres have been calculated using current digitized (GIS) maps.

Year Reach AML column displays the last time AML was achieved on the HMA.

Acres transferred from BLM to another agency is not deducted from the HA acreage.

Most horse population estimates are direct counts and are not adjusted for animals not observed.

ARIZONA WILD HORSE AND BURRO AREAS ADMINSTRATED BY THE BUREAU OF LAND MANAGEMEI FY 08

Herd Management Areas and Herd Areas have been placed in separate tables by state.

Herd Area statistics are a reflection of each state's current estimated population information as of February 28, 2007.

Populations do not reflect any changes after February, 2007. (i.e. foal crops or gathers).

BLM policy is to establish AML as a range with upper and lower levels, the numbers displayed represents the upper limit.

Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

Acres have been calculated using current digitized (GIS) maps.

Year Reach AML column displays the last time AML was achieved on the HMA.

Acres transferred from BLM to another agency is not deducted from the HA acreage.

Herd Management Areas and Herd Areas have been placed in separate tables by state.

Herd Area statistics are a reflection of each state's current population information as of February 28, 2006.

Populations do not reflect any changes after February, 2006. (i.e. foal crops or gathers).

BLM policy is to establish AML as a range with upper and lower levels, the numbers displayed represents the upper limit.

Gather Mo/Year is based on 10 or more animals removed during the year.

Acres have been calculated using current digitized (GIS) maps.

Year Reach AML column displays the last time AML was achieved on the HMA.

Acres transferred from BLM to another agency is not deducted from the HA acreage.

1. Appropriate Management Levels, *indicates estimated AML.*
2. AML is reported as the maxium number of animals sustainable on a yearlong basis.
3. Heath Creek-Sheepshead (OR004) was combined with Sheepshead (OR016) in the Southeast Oregon RMP, Sept. 2002.
4. Coyote Lake was combined with Alvord Tule Springs in the Andrews Management Unit RMP, 2005.

Herd Management Areas and Herd Areas have been placed in separate tables by state.

Herd Area statistics are a reflection of each state's current population information as of February 28, 2005.

Populations do not reflect any changes after February, 2005. (i.e. foal crops or gathers).

BLM policy is to establish AML as a range with upper and lower levels, the numbers displayed represent the upper limit.

Gather MO/YEAR is based on 10 or more animals removed during the month.

Acres are being recalculated with GIS and will be displayed in next year's information.

Year Reach AML column displays the last time AML was achieved on the HMA.

AML totals in state statistics do not include HMAs where AMLs are not established.
