

Request for Motorized/Mechanized Use in the Owens Allotment, Little Jacks Creek Wilderness Area

On June 21, 2023, the BLM Bruneau Field Office received a request to maintain reservoirs and troughs in the Owens Allotment, of which one trough is located within the Little Jacks Creek Wilderness. The applicant requested the use of a backhoe to dig out around trough and remove all sediment / build up that has piled around the troughs throughout the years. This request is a one-trip ingress/egress that would be via cherry-stem road and pre-existing two-track road (closed after wilderness designation).
