

**Original river
channel**

The image is a satellite photograph of a river system. A dashed blue line traces a winding path through the landscape, representing the original river channel. A solid orange line shows a newly cut channel that branches off from the original channel, moving in a more direct, south-southwest direction. Two yellow circular markers are placed at the start and end of this new channel. The surrounding terrain is a mix of green vegetation and brownish soil, with various smaller channels and ponds scattered throughout.

**Start of new river channel
Latitude 65.331462
Longitude -145.745712**

**Hazard: newly cut, narrow and
vegetation choked channel.
Portage may be necessary.**

**End of new river channel
Latitude 65.329596
Longitude -145.74516**
