

## Format for Reporting Geophysical Exploration Activity

- Please upload your geophysical shapefiles (zipped) to the following ftp site:  
<ftp://ftp.blm.gov/blmincoming/WO/>

Clicking on this link should open a window where zipped shapefiles can be dragged into. (You may need to click on "View"; "Open FTP site in Windows Explorer".)

- Some naming standards and minimal attributes are provided here as guidance:

Name the zipped shapefile ST\_FO\_YYYYMMDD where

ST= State Office abbreviation

FO= Field Office abbreviation

YYYYMMDD=Numeric year, month, day the data was placed on the ftp site.

- Attributes should minimally include:

DT\_RCVD = a date field for querying. Could be received date, filed date, or exploration date.

NAME = some identifying name that would distinguish areas of exploration.

Please send email notification to [john\\_reitsma@blm.gov](mailto:john_reitsma@blm.gov) when your data has been successfully uploaded to the ftp site.

If you have any questions you may contact Brett Young at 202-912-7153 or John Reitsma at 303-236-1984.
