

**BUREAU OF LAND MANAGEMENT
TRANSPORTATION PLANNING PROJECT PROPOSALS FOR FY 2010
FOR
SAFE, ACCOUNTABLE, FLEXIBLE, EFFICIENT TRANSPORTATION EQUITY ACT-
A LEGACY FOR USERS (SAFETEA-LU)**

NOTE: This form should be duplicated and used for each individual project. Please read Attachments 1 and 2 (BLM's Implementation Plan/FY 2010 Program Proposal, and the FHWA Eligibility Guidelines, respectively). Attachment 1 accompanied our funds request letter to the Federal Highway Administration, and is a commitment on how BLM intends to use the SAFETEA-LU funds this fiscal year. Attachment 2 provides FHWA project guidelines which were developed this fiscal year to ensure that land management agencies are meeting the intent of the transportation planning program. Your transportation planning project proposals should be geared to meet the intent of Attachments 1 and 2. There are two caveats that are mentioned above. Specifically, a project which intends to use traffic counters for data collection is considered acceptable (see Item 7 in Attachment 2), and, kiosks and signs are not allowed because they are considered construction.

State: Use abbreviations such as CA, ID, etc.

Name of State SAFTEA-LU Coordinator(s):

State Office or District/Field Office Originating this Project:

Project Title:

Project Coordinator (DO/FO):

Project Location:

Requested amount of funds for this project: \$

Project Description: Please be very specific and include the following:

- a. Purpose of the work
- b. General Outcome (i.e., what do you hope to accomplish?)

Anticipated Outcome: Please be very specific and include the following:

- a. Description of what will be accomplished.
- b. Description of benefit to the BLM
- c. Description of benefit to the public.
- d. Description of benefits to outside partners such as Departments of Transportation, local governments, etc.

Lessons Learned from FY 2009:

- a. Describe how you will use lessons learned from FY 2009 to perform the work in FY 2010.
- b. Additional comments (optional).
