\_\_\_\_\_ Extensive Recreation Management Area (ERMA)

(Name)

ERMAs are administrative units that require specific management consideration in order to address recreation use, demand, or Recreation and Visitor Services (R&VS) program investments. ERMAs are managed to support and sustain the principal recreation activities and the associated qualities and conditions of the ERMA. ERMA management is commensurate and considered in context with the management of other resources and resource uses.

## ERMA OBJECTIVE(S) DECISION

ERMA objectives must define the recreation activities and the associated qualities and conditions which become the focus for R&VS management.

**Objective Statement** (e.g. By 2015, the Bailey Lake ERMA will offer recreation opportunities, in a relatively unchanged physical recreation setting, that facilitate the visitors' freedom to participate in a variety of dispersed, non-motorized/non-mechanized recreation activities.):

## MANAGEMENT ACTIONS & ALLOWABLE USE DECISIONS

Identify management action and allowable use decisions for R&VS and other programs necessary to: facilitate visitor participation in the identified outdoor recreation activities; maintain particular recreation setting characteristics, address visitor health and safety, resource protection, and use and user conflicts; and, address the type(s), activities, and locations where special recreation permits would or would not be issued.

**Recreation and Visitor Services Program** (e.g. camping limits, recreation permit/fees, conditions of use):

**Other Programs** (e.g. stipulations on mineral or other development, types and modes of travel designations, or visual resource management classes):

## IMPLEMENTATION DECISIONS

Implementation decisions are actions to achieve or implement land use plan decisions. Implementation decisions include: management, administration, information and education and monitoring.

**Implementation Decisions** (e.g. The land use plan decision may be to designate overnight camping areas while the supporting implementation decisions would address specific site locations, size and amenities to be provided.):
