

Program Element GK

Program Element Cost Recovery Mineral Materials - Noncompetitive Sale

Example Notes: None

PE Description: This program element applies to mineral materials non-competitive sales (excluding sales from community pits or common use areas) processed in response to applications submitted on or after November 7, 2005 (the effective date of the cost recovery regulations).

Program element **GK** includes all work associated with mineral materials non-competitive sales, all associated case recordation and data entry, all costs of processing the applications for contracts and permits, including NEPA, valuation, Section 7 consultation, Section 106 compliance, mining and reclamation plan review, and other clearances for processing use authorizations as appropriate. The cost should include all cadastral surveys, GIS support, data management support, consultations with Indian Tribes and Alaska Native Corporations, and any outreach or environmental education done in support of this workload. Includes all costs of processing the applications for contracts. Includes the cost of land use planning amendments or commercial activity plans prepared solely for an individual disposal.

This program element is only used with subactivity 5110.

Continue to use program element EP for mineral materials non-competitive sales processed in response to applications submitted prior to November 7, 2005, non-competitive sales from community pits and common use areas.

New Resource Management Plans or major multidisciplinary plan revisions are charged to functional area 1610, not to functional areas 1330 or 5110. Appropriate planning program elements should be used for new plans or major plan revisions.

Unit Of Measure: Non-competitive sales - Number of contracts processed (issued, rejected or withdrawn). Contracts are tracked by date of processing in LR2000 and ALIS for Alaska. Offices will enter information in accordance with data standards; enter data at the time of contract issuance. Offices will report on number of non-competitive sales completed during the fiscal year.

**System Interface/
Data Elements:** LR2000 and ALIS for Alaska data. Casetype/Action Code relationship that will be used for counting accomplishment are shown: Casetype/AC's to Count

3611xx/ only one unit for either 276, 125, or 130

GK Accomplishment is the Sum Total of Counts for the Selected Time Period

National Program

Element Contact: George Brown/Mitchell Leverette, WO 320, (202) 912-7118

Project Code: A project specific cost recovery project code is mandatory with this program element.

Strategic Plan Mission Goal

M2.G3.S3 Manage non-energy mineral development

BLM Work Process

Program Element GL Cost Recovery Mineral Materials – Competitive Sale and Contract Renewal

Example Notes: None

PE Description: This program element applies to mineral materials competitive sales contracts and competitive sale contract renewals processed in response to applications submitted on or after November 7, 2005 (the effective date of the cost recovery regulations).

Program element **GL** includes all work associated with mineral materials competitive sales contracts and competitive sale contract renewals, all associated case recordation and data entry, all costs of processing the applications, including NEPA, appraisal, Section 7 consultation, Section 106 compliance, and other clearances for processing use authorizations as appropriate. The cost should include all cadastral surveys, GIS support, data management support, consultations with Indian Tribes and Alaska Native Corporations, and any outreach or environmental education done in support of this workload. Includes the cost of land use planning amendments or commercial activity plans prepared solely for an individual disposal.

This program element is only used with subactivity 5110.

Continue to use program element EP for processing applications for mineral materials competitive sales within community pits and common use areas.

New Resource Management Plans or major multidisciplinary plan revisions are charged to functional area 1610, not to functional areas 1330 or 5110. Appropriate planning program elements should be used for new plans or major plan revisions.

Unit Of Measure: Competitive contracts and contract renewals -

Number of contracts and contract renewals processed (issued, rejected or withdrawn) is tracked by date of processing in LR2000 and ALIS for Alaska. Offices will enter information in accordance with data standards; enter data at the time of contract issuance. Offices will report on number of authorizations issued during the fiscal year by category (i.e. renewable or nonrenewable competitive mineral materials sales, competitive sale renewals).

**System Interface/
Data Elements:** LR2000 and ALIS for Alaska data. Casetype/Action Code relationship that will be used for counting accomplishment are shown: Casetype/AC's to Count

36131x/ only one unit for either 276, 125, or 130
