# ENERGY

## Electrical Transmission Development

### TransCanyon Cross-Tie Project

The BLM Fillmore (Utah) Field Office is responding to comments received during the public comment period and preparing a final environmental impact statement. The 45-day comment period for the proposed 214-mile 500-kV transmission project closed Jan. 9, 2024, following a 14-day extension.

The proposed project would connect the Clover Substation in central Utah with the Robinson Summit Substation in White Pine County. Responding to Tribal concerns, one alternative provides for a southern route through northern Lincoln and Nye counties where it will follow the SWIP South corridor northward to the Robinson Summit substation, avoiding Spring Valley. More information, including maps and other planning documents, are available at <https://bit.ly/ePlanningCrossTie>.

### SWIP North Project

The BLM Elko District is the designated lead for an authorized 1,500 MW 500 kV transmission line connecting the Midpoint substation north of Twin Falls, Idaho, to the Robinson substation northwest of Ely, where the line would connect with SWIP South. The LS Power line would extend 257 miles on BLM-administered lands in the Twin Falls, Elko, and Ely districts. The project is awaiting a notice to proceed pending cultural inventories, sage grouse mitigation, and ethnographic studies. The review of Terracon’s Geotech Cultural Report is complete.

### Robinson Substation Expansion

The Bristlecone Field Office in January 2023 received an application from the same proponent for a 1.3-mile transmission line connecting SWIP North and the Robinson substation. The BLM has since received an application to expand the Robinson Substation by 55 acres to accommodate future electrical transmission. The BLM in September 2023 signed a Memorandum of Understanding with Great Basin Transmission for the Robinson Summit Expansion / Interconnect. A kick-off meeting was held in October 2023 to prepare an environmental assessment. LS Power is preparing a preliminary EA. Cooperating agency invitation letters were sent on March 21, 2024.

### Green Link North

The 30-day public scoping period ended April 10, 2024. The BLM re-scoped the Greenlink North Transmission Project to evaluate a new 201 mile long by three-mile-wide utility corridor in which the project would be located. There is currently no designated utility corridor between Ely and Yerington, Nev. There is no change to NV Energy's stated

need for the project. Additional details are available at <https://eplanning.blm.gov/eplanning-ui/project/2017033/510>

## Renewable Energy Development

### White Pine Pumped Storage

White Pine Waterpower, LLC, a subsidiary of rPlus Hydro, has filed a final license application with the Federal Energy Regulatory Commission (FERC) for a closed-loop pumped storage hydropower facility. The proposed facility, which would be constructed in White Pine County north of Ely, received FAST 41 authority from FERC in March 2023. The White Pine Pumped Storage facility would provide up to 1,000 megawatts (MW) of electrical generating capability with an overall energy storage capacity of 8,000 megawatt-hours (MWh) per day by moving water between an upper and a lower reservoir to store the energy for later use. A new 25-mile, 345-kV single-circuit transmission line would extend from the project to the Robinson Summit substation. FERC will begin an environmental review and licensing process for the project with local, state, and federal agencies. The Bristlecone Field office is leading a Technical Working Group for wildlife that consists of representatives from the BLM, U.S. Fish and Wildlife Service, Nevada Department of Wildlife, White Pine County, rPlus Energies and Sagebrush Ecological Technical Team.

### Pantheon Solar Development Project

The BLM is working with the project proponent on Variance Factor Analysis as outlined in the October 2012 Approved Resource Management Plan Amendments/ Record of Decision (ROD) for Solar Energy Development in Six Southwestern States.

The BLM in October 2023 segregated for a two-year period public lands proposed for use by the Pantheon Solar Development Project, preventing the land from being sold or subject to new mining claims while BLM processes the application. The project proposes the use of 2,751.5 acres of Bristlecone Field Office-managed lands in Jakes Valley south of Highway 50, about 15 miles west of Ely, Nev. If approved, the project could generate up to 400 megawatts of solar energy.

A public meeting was held in January 2024 to receive input to be incorporated into the Variance Factor Analysis Report (VFAR). Additional presentations were conducted in February 2024 before the White Pine County Commission and White Pine County's Natural Resources Committee. The public input period concluded March 29, 2024. The Final VFAR package is awaiting State Director review.

### Stagecoach Wind LLC Type 3

Processing of the application is currently on pause per request of Arevia Power. In September 2023, the BLM set aside lands for Arevia Power's proposed Stagecoach Wind Project, a planned 600-megawatt installation that would be located in south Newark Valley, about 40 miles west of Ely or 18 miles east of Eureka, Nev.

The announcement set aside nearly 70,000 acres in the project area for two years from appropriation under the public land laws, including location under the Mining Law, but not the Mineral Leasing Act or the Materials Act, to prevent new mining claims from interfering with project review or development. Existing claims are not affected. The action was taken prior to the BLM beginning the environmental analysis of the proposed project under the National Environmental Policy Act. If completed, the proposed project would be the second and largest wind generation facility in Nevada. More at <https://www.permits.performance.gov/permitting-project/fast-41-covered-projects/stagecoach-wind>

The paleontology and cultural resource inventories are complete. The paleontology survey found nothing of note.

### **Samantha Solar**

The BLM is working with the project proponent on Variance Factor Analysis as outlined in the October 2012 Approved Resource Management Plan Amendments/Record of Decision for Solar Energy Development in Six Southwestern States.

A revised VFAR was received on March 20, 2024. Tribal Notification Letters were sent on March 21, 2024. A Tribal Coordination meeting was held at the Ely District Office on April 19, 2024. The segregation notice was submitted for cadastral review on March 25, 2024. The notice is awaiting publication in the Federal Register.

### **Wind and Solar Applications**

The Bristlecone Field Office continues to receive applications for solar and wind testing, and development. Development is prohibited within Greater Sage Grouse Priority Habitat under the 2015 Greater Sage Grouse Amendment. Testing is allowed on small, individual sites. Disposition of applications is starting with subsequent NEPA being developed and decision process on testing applications beginning.

## **LANDS & REALTY**

### **Lincoln County Water District Rights-of-Way**

The Caliente Field Office in fiscal year 2024 will begin work on a Lincoln County Water District Plan of Development for a main pipeline and delivery lines to transport groundwater to Lincoln County Lands Act disposal lands near Mesquite. The Lincoln County Power District has also proposed access roads and a power line to support the water project. The field office will conduct public scoping for an environmental assessment to amend existing, or issue new rights-of-way, in accordance with the Lincoln County Lands Act Groundwater and Utility Development Environmental Impact Statement and Record of Decision (2008).

### **CalTech DSA-2000 Radio Telescope Array Project**

The Bristlecone Field Office has established a wildlife working group to include the Nevada Department of Wildlife, Forest Service, U.S. Fish and Wildlife Service, Sagebrush Ecosystem Technical Team, and California Institute of Technology (CalTech) regarding a CalTech proposal to erect a Radio Telescope Array Project (DSA-2000) on approximately 63,250 acres of the public lands in north Spring Valley, about 15 miles north of the proposed Bahsahwahbee National Monument boundary. CalTech submitted a Right-of-Way application in September 2023. An amendment to the Plan of Development was submitted in January 2024. The BLM conducted formal Tribal Consultation with the Duckwater Shoshone Tribe and the Ely Shoshone Tribe during a site visit in May 2024.

## **MINERALS**

### **Mining**

#### **Kinross Bald Mountain Mine (KG-BM)**

The BLM on Friday, May 24 published in the *Federal Register* a Notice of Availability for the Final Environmental Impact Statement analyzing the proposed Bald Mountain Mine Plan of Operations Amendment Juniper Project, initiating a 30-day availability period.

The KG Mining Inc.-proposed Juniper Project would modify and expand operations on BLM-administered lands within the North Operations Area (NOA) of the existing Bald Mountain Mine, resulting in approximately 4,000 acres of new surface disturbance and extension of the NOA mine life by 11 years.

The BLM's preferred alternative, Alternative A, was developed in close coordination with the Nevada Department of Wildlife. It minimizes and avoids impacts to existing mule deer migration corridors within the expansion area and provides mitigation measures for impacts to Greater Sage Grouse. The final EIS is available online at <https://go.usa.gov/xAm2g>.

Publication of the Notice of Availability in the *Federal Register* by the U.S. Environmental Protection Agency initiates a 30-day public review period, during which comments may be submitted electronically to [blm\\_nv\\_eydo\\_juniper\\_eis@blm.gov](mailto:blm_nv_eydo_juniper_eis@blm.gov) or by mail to the BLM Bristlecone Field Office BMM EIS Project, 702 North Industrial Way, Ely, Nevada 89301, ATTN: Robbie McAboy.

#### **Ridgeline Minerals, Selena Exploration EA**

The Bristlecone Field Office in May released a Decision Record and Finding of No Significant Impact (DR/FONSI) and final Environmental Assessment (EA) for the Ridgeline Minerals Corporation Selena Exploration Project. The 30-day appeal period concluded June 7, 2024. The DR/FONSI and final EA are available online at <https://eplanning.blm.gov/eplanning-ui/project/2027206/510>.

Ridgeline’s proposed exploration project in Butte Valley would be conducted in phases over an estimated 10-year period. The plan submitted is for Phase 1 with future planning to be submitted for subsequent phases. Under Phase 1, the proponent would construct 43,224 feet of new road and 48.5 acres of pad with between 200 to 1,000 exploratory holes. Six drill holes would be open at any given time. A plan amendment in the form of an annual work plan would be submitted annually prior to any work being authorized as part of the proposal.

### **NevGold USA, Limousine Butte EA**

The BLM is reviewing comments received on the preliminary Limo Butte Exploration Project Environmental Assessment. The 30-day public comment period concluded June 3, 2024. The proposed project would be located on public land in White Pine County, about 65 miles north of Ely. NevGold USA is proposing a project area of 16,455 acres with 200 acres proposed for disturbance. The proposal calls for up to eight open exploration holes at any one time. The preliminary environmental assessment is available online at <https://eplanning.blm.gov/eplanning-ui/project/2027207/510>.

### **Mackie/Tenacity Mine**

The Caliente Field Office has received a complete mine Plan of Operations for the perlite mine located near the South Pahroc Range, about 27 miles west of Caliente, and is preparing an environmental assessment. The mine has been operating for several decades.

## **Oil and Gas**

### **Oil and Gas lease sales**

The June 2024 lease sale was conducted Tuesday, June 25. No bids were received for the single parcel offered. The 2,080-acre parcel is located in northern Lincoln County on lands administered by the Caliente Field Office.

### **Applications for Permit to Drill**

Western Oil Exploration Company has not finished drilling the Scott Federal #35-1 exploratory well. The BLM issued a decision on Dec. 16, 2022, informing Western Oil that their lease has expired and they are no longer authorized under diligent drilling. Western Oil and the lease holder have filed an Appeal and Petition for Stay.

## **SPECIAL LEGISLATION**

### **Lincoln County Conservation, Recreation, and Development Act – public land sales**

The Caliente Field Office will prepare an environmental assessment for the proposed multi-phase sale of 67 parcels of public land, totaling 5,445 acres in Lincoln County, Nev. The Ely District is directed by the Lincoln County Conservation, Recreation, and Development Act of 2004 to dispose of up to 90,000 acres of public land within the county. Parcels identified by Lincoln County and BLM for rounds 5 through 11 may be offered for public sale annually through competitive auctions. Additionally, the Ely District may offer for competitive sale up to four parcels from Round 4 as early as Fiscal Year 2024 or 2025. Lands for disposal were identified in the Ely District Record of Decision and Approved Resource Management Plan (2008).

## **White Pine County Conservation, Recreation, and Development Act – public land sales**

The Ely District may offer for competitive sale up to three parcels from Round 3 and 4 as early as Fiscal Year 2024. Lands for disposal were identified in the Ely District Record of Decision and Approved Resource Management Plan.

## **RANGELAND MANAGEMENT**

### **Rangeland Monitoring/Term Permit Renewals**

The Bristlecone Field Office has completed Standards Determination Documents for the Indian George, Stephens Creek, and Sacramento Pass allotments. The Indian George Environmental Assessment was available for a 30-day public comment period. The BLM is currently analyzing the comments received and finalizing the EA.

The Standards Determination for Cave Valley Ranch was completed in September 2022. Initiation of the environmental assessment is on hold due to staffing shortages.

The Bristlecone Field Office and Basin and Range National Monument are preparing a TPR for the John Uhalde and Co. outcome-based grazing allotments. Land Health Assessments and Standards Determination Documents for the outcome-based grazing project are being finalized. A preliminary environmental assessment is anticipated to be available for public comment in early 2024.

The BLM is conducting a Land Health Assessment for the Duckwater allotment. The assessment is being organized by Use Area and be used for the allotment's Term Permit Renewals. Coordination with the livestock grazing permit holders is ongoing.

## **FIRE MANAGEMENT**

### **Emergency Stabilization and Rehabilitation**

*The Emergency Stabilization and Rehabilitation (ESR) program takes emergency actions to stabilize and prevent unacceptable damage to natural and cultural resources and to minimize threats to life and property resulting from the effects of fire. The program also makes efforts to repair or improve fire-damaged lands unlikely to recover naturally to management approved conditions. The ESR program is currently:*

- Coordinating with Bristlecone Field Office range staff regarding riparian protection fences planned for two springs within the 2022 Kinsley Fire burned area.
- Coordinating with Caliente Field Office staff to complete NEPA for small study enclosures within the 2020 Miller and Stewart Canyon fires' burned areas.
- Conducting rapid assessment monitoring on six older fires.
- Planning a fall reseeding on the 2015 Diamond, 2016 Pinto, and 2017 Hatchery fires.

- Working on agreements modifications for Cooperative and Interagency agreements.

### **Fuels Reduction and Habitat Restoration**

*Landscape scale fuels reduction projects restore watershed health and improve wildlife habitat while reducing catastrophic wildfire risk. Treatment methods include, but are not limited to, hand-thinning, chaining, mastication, and prescribed fire use followed by aerial and/or ground seeding. The District often partners with federal and state agencies, Native American tribes, and private landowners. Some projects receive Southern Nevada Public Land Management Act funding. Currently:*

- Fuels projects are on hold due to wildlife restrictions. The fuels program is preparing projects for later this summer when work resumes.

## **RECREATION & TRAVEL MANAGEMENT PLANNING**

### **Garnet Hill Recreation Area Management Plan**

A contract for design and construction is out for bid. Construction is scheduled to begin in fiscal year 2025. The Bristlecone Field Office released a Decision Record and Finding of No Significant Impact for the Garnet Hill Recreation Area Management Plan and final Environmental Assessment in November 2023. The 30-day appeal period concluded in December 2023.

The field office is improving both of the Garnet Hill Recreation Area and Egan Crest trail systems west of Ely. The Plan addresses how the BLM will manage and maintain the new recreation area, and anticipated increase in public visitation. Improvements include upgrading roadways, enlarging existing trailheads, adding overnight campgrounds, and constructing signed motorized and non-motorized trails systems. All facilities and some trails will be ADA accessible. Funding for the capital improvement project is provided through Round 18 of the Southern Nevada Public Land Management Act.

The Decision Record, Finding of No Significant Impact, and Garnet Hill Recreation Area Management Plan and final Environmental Assessment are available online at <https://bit.ly/3VdC38R>.

### **Highland Range Non-Motorized Trail**

An International Mountain Bicycling Association (IMBA) design team has completed 8.15 miles of single-track mountain biking and hiking trails that will connect Pioche with Cathedral Gorge State Park. Trail construction is scheduled to be completed by midyear 2025. Project funding is provided by the Southern Nevada Public Land Management Act through the Caliente Field Office.

### **Mount Irish Cultural Resource Protection and Visitor Enhancements Project**

Project construction to establish a vault toilet, four primitive camp areas, walking trails that connect the public rock art areas, and interpretive kiosks on cultural resource protection began in July 2023. The following September, National Public Lands Day volunteers installed initial trail signage. Mount Irish is a diverse collection of cultural resources that have drawn visitors to the area for years. Increased visitation and lack of amenities have resulted in trash, rock campfire rings, and human refuse in close proximity to rock art at this location within the Basin and Range National Monument. The project will enhance the visitor experience at the site and protect rock art areas.

### **Multipurpose Sagebrush Discovery Trail Travel and Transportation Management Plan**

The BLM has issued a request for quotes for project design and construction. Design, engineering and construction are likely to occur in fiscal year 2025. The Bristlecone Field Office issued a Decision Record and Finding of No Significant Impact in September 2023. Due to public comment received the field office selected an adjusted Alternative C that incorporated changes to the trail's layout. No appeals were received. The non-motorized trail would be located on public lands adjacent to Baker, Nev., and consist of up to two miles of existing two-track roads, closed to motorized vehicles and improved to make them available for hiking, biking, skiing, and walking; construction of approximately 400 feet of new trail and two trailheads, and installation of informational kiosks and interpretive signs, and benches and shade structures. The travel plan and phase one of the project is funded by the Southern Nevada Public Land Management Act.

## **WILD HORSE MANAGEMENT**

As of June 26, the Caliente Field Office has gathered 382 wild horses from in and around the Caliente Complex, in Lincoln County, Nev. The bait and water trap gather began April 2 and is scheduled to continue through October 1, 2024. The field office expected to gather and remove approximately 350 wild horses.

The purpose of the gather is to prevent undue or unnecessary degradation of the public lands associated with excess wild horses and to restore a thriving natural ecological balance and multiple-use relationship on public lands, consistent with the provisions of Section 1333(b) of the 1971 Wild Free-Roaming Horses and Burros Act.

The Complex has nine herd areas encompassing over 911,890 acres of public and private lands. The BLM manages the Complex for zero wild horses due to insufficient forage and water to sustain healthy and viable herds long-term. The BLM in February 2024 documented 1,022 wild horses within and directly outside the herd areas.

Animals identified for removal will be transported to the Axtell off-range corrals, in Axtell, Utah; Delta Wild Horse and Burro Facility, in Delta, Utah; and Sutherland off-range corrals, in Sutherland, Utah. Gather reports and additional information is available on the BLM website at

<https://www.blm.gov/programs/wild-horse-and-burro/herd-management/gathers-and-removals/nevada-ely-do/2024-caliente>.

*Contact Chris Hanefeld at (775) 289-1842 or [chanefel@blm.gov](mailto:chanefel@blm.gov) for more information on these and other projects/programs in the district.*
