Adam: Attached is the brief background. The excitement in Skull Valley over the mine seems to be growing. I had 5 calls about it today. Also, Yavapai County Supervisor Rowle Simmons is having his annual Skull Valley town hall meeting tonight, which many people thought was going to be a BLM public meeting about the mine (it is not and never was). Nevertheless, the mine issue and questions are going to come up and reporters are expected to be there.

Supervisor Simmons has asked me to participate in an Oct 21 public meeting in Skull Valley regarding the mine and mining law.

The attached should be helpful for drafting any informational materials about Kirkland Mining Co's Skull Valley exploration. This is the overview beginning with the company's April 2015 *mineral materials* plan of operation submission, to their change of course and submission of a *locatable minerals* mining notice and BLM's acceptance of their reclamation bond in September 2015 (the State Office will process it any day now).
