Re: Request for Mineral Materials Sales Contract

Mr. Haas,

Please be advised that this correspondence shall serve as an official request for a Mineral Materials Sales Contract for Kirkland Mining Company's stockpile located near Kirkland, Arizona.

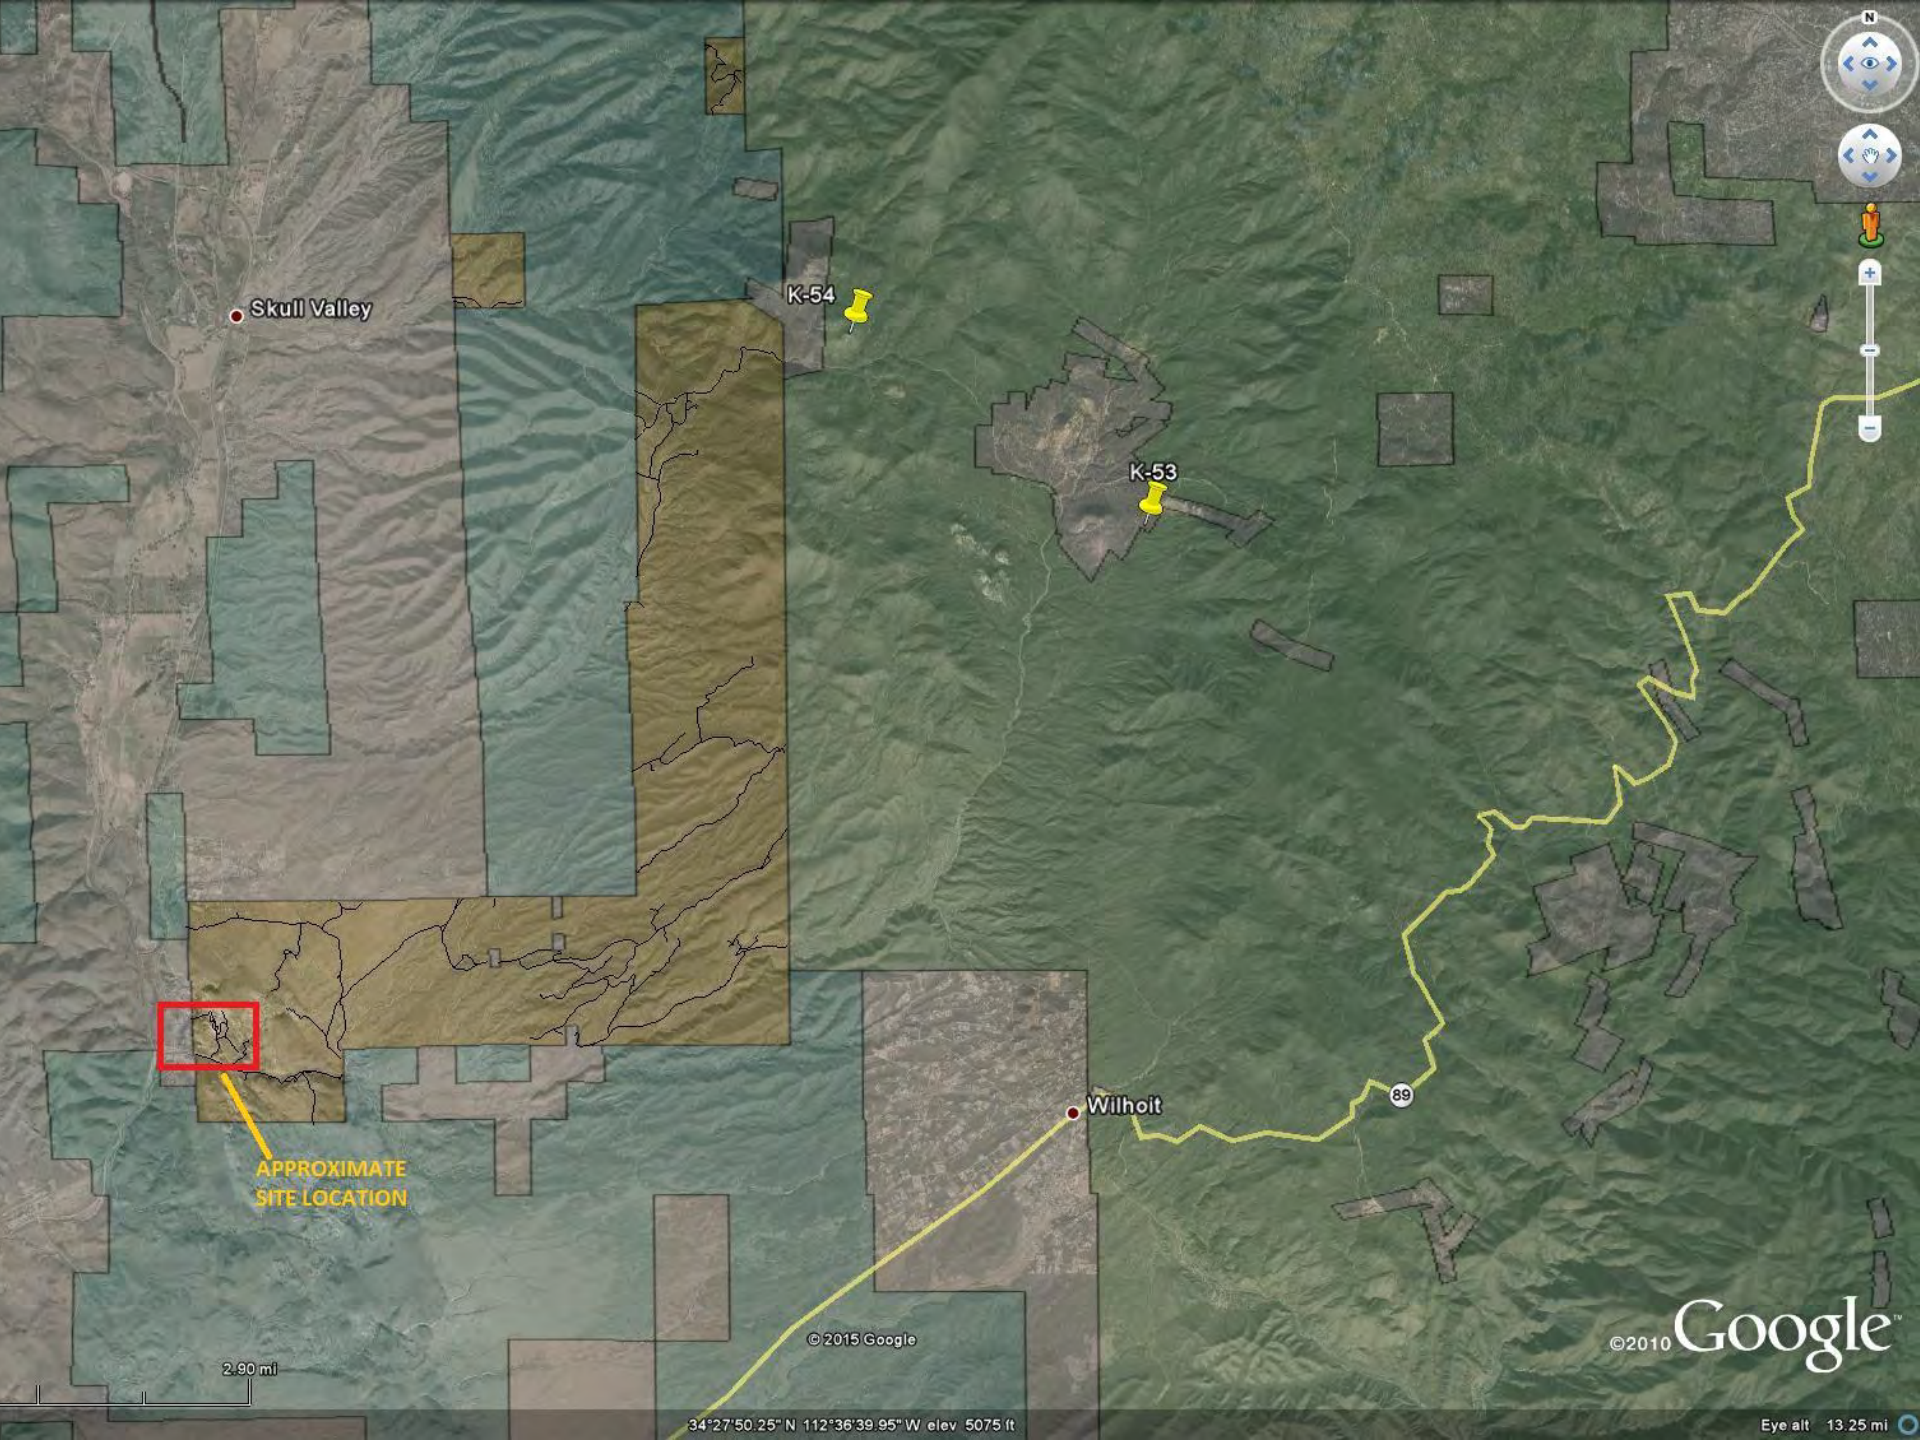

Kirkland Mining Company ("KMC") will, concurrent with this correspondence, submit a Plan of Operations for the removal of the a tuff stockpile from one of their unpatented mining claims. KMC owns 18 mining claims in Northwestern Arizona in an area known as Skull Valley, near Kirkland, Arizona in Yavapai County. The existing crushed tuff stockpile sits on the *Capitol* placer and lode claim No. 6 in Section 28, Township 13 North, Range 4 West relative to the Gila and Salt River Baseline Meridian. KMC Proposes to excavate and sell the millings as an alternative replacement to Class F fly ash used in cement manufacturing processes. KMC intends to perform certain improvements to the an existing access road within a private access easement it owns which will serve as a direct access to Iron Springs Road.

Accordingly, pursuant to 43 CFR § 3602, KMC requests the BLM prepare a non-competitive mineral materials sales contract for the sale of its tuff stockpile, which approximates 43,000 metric tons.

Please advise us as to what other documentation or procedures you will require from KMC for the preparation of the contract. Please feel free to contact me at the information provided below if you have any questions or comments.

Best regards,

Areta Zouvas
Vice President/General Manager
Kirkland Mining Company
