Subject: Questions about fencing required for quarries and mines in residential areas

Hi Tim,

It was really nice talking to you the other day. I was just following up to get the exact regulation for the state statute regarding fencing around open pits in residential areas. This is in regards to Kirkland Mining Company's proposed mining plan of operation submitted recently to the BLM for a pozzolan operation (which falls under mining/locatables even though it is similar to a quarry operation) near Skull Valley, Arizona. I just wanted to offer some guidance for the operator, she is starting the EA process. There are a few residences and a church nearby.

Thank you so much!
