Areta: Today, I signed the Memorandum Report regarding the locatability of the pozzolan material from the Skull Valley area Capital claim, and our finding that it has distinct and special value. Shelby Cave will send you a copy. We intend to process your April 18, 2017 plan of operations, submitted pursuant to 43 CFR 3809, in accordance with §3809 regulations and BLM Handbook 3809-1.

Shelby and our folks can begin working with Amanda Best with WestLand Resources and Al Burch regarding the scoping / public open house that we want to have in Skull Valley in June regarding the plan of operations.

Hi All,

I just want to say thank you to the entire BLM team for meeting with Al and Amanda for the submittal of our MPO, Cultural and Biological resource reports.

Rem, Matt and Jeff:

As you know this was a big step and long time coming for KMC. We are very pleased to have a continued working relationship with the BLM and appreciate all your the consideration you have shown us throughout the years.

I want to follow up, and see if you had news from Matt Shumaker on the Uncommon Variety. I would like to know if there is an estimated time when he will have the review completed. I know Matt has had the review since March 8th and realize he may be busy. Any feedback on completion would be much appreciated.

Meanwhile if any of you have any comments or questions on the MPO; please feel free to contact myself, Amanda or Al.

Thanks again for your efforts they are much appreciated!

FYI. We determined that the Skull Valley mine tuff/pozzolan is a locatable mineral and we will be moving ahead with an EA (to be prepared by the WestLand Resources) on the mining plan of operations. Paul, Codey may be back by the time that we need to review the EA, but if/when we need wildlife biology expertise we will need to call on you in the meantime. Thanks.
