SHORT CIRCUIT CURRENT RATING

This panelboard has a maximum short circuit current rating of 65,000 RMS symmetrical amperes, 120/240 volts AC. The actual rating is dependent on the branch breakers installed in this panelboard, the feeder/main breaker, if any, installed ahead of or in this panelboard, and the main breaker if any, installed ahead of the feeder/main or branch breakers. The correct branch breakers, main breaker/branch breaker series combinations to be used for various short circuit combinations, and main breaker/feeder/branch breaker series combinations to be used for various short circuit current levels are listed in the tabulation below. Any circuit breaker installed, replaced, or added in this panelboard must be of the interrupt type as indicated in the tabulation below.
