Assigned East Structure Goup. Responsible area Kelso Valley Middle School to the south along KVR. Assigned resources to Fire line construction and structure triage. Approx 1430 winds picked up and we lost the dozerline. Fire made a push through Cortez Canyon and destroyed several out building and vehicles. One CalFire dozer transport was burned to the ground and several power poles and Verison com box were destroyed. Then fire layed down due to decrease in the wind. Approx 1.5 hrs later the pick up again and pushed the fire through the town of Bull Center wher the Kern ST and task force along with Fulton did structure triage and fire suppression. Several buildings, vehicles and exposures were lost. 6/25 through 6/27continued control efforts and mop up along KVR.

Narrative Text
On arrival at the fire I was assigned to Squirrel Valley Structure Protection Group. On arrival I went to the Fire Map box and acquired the maps for that area. I then entered the area following E 371 up and into the subdivision. I put out a broadcast of my leaders intent of - 1St priority was for life safety, 2nd was to assist where necessary with getting people to safety, and also stated that all resources should use the tactic of "Flame Front

Following". Further more I stated that for the time being that if any structure had any fire in the structure that they were to let it burn and focus on life safety.

The conditions at this time were extremely critical with gusting winds and near zero visibility smoke conditions. Crews were faced with severe smoke and heat conditions as well as numerous civilians driving erratically to evacuate and to assist friends and family members and large animals with evacuations. This presented an extreme hazard to Fire Fighters and ultimately delayed our ability to save homes and property.

During the incident civilians came to my location and were asking if we could go to their address and look for lost family members. As the flames had for the most part blew past Squirrel Valley we changed the Leaders intent to begin looking for lost persons and then to begin suppress any fires that were popping up. All persons that we were asked to look for were eventually found and reunited with their family.

As far as I can gather the following units were assigned to me - E371, E378, E41, P472, BLM 3191, BLM 3130, BLM Div Sup (b) (6), (b) (7) (C), St 1656C, ST 5175B, and Safety 3.

We remained on the incident until approximately 1800 the next day and then went into Base Camp for one night of R and R.

On the morning of June 27th I was reassigned to a Cal Fire Disaster Investigation Team and an A-Rep for the County of Kern. This lasted until 6-28-16 at 1700. I was then demobed and sent home.

Narrative Text	Dispatched to a reported grass fire possibly at the Kern Valley Archery Range. As we were responding on Isabella Blvd. I could see light smoke coming from the Archery Range area as if there had been a fire but had consumed all the available grass and was smoldering in the heavy fuels. We arrived at the Archery Range road and the gate was closed and locked. FF72 cut the lock while Eng72 flagged the roadway into the incident. I communicated the location and access to incoming resources. As we came up the road I could see that there was an area that had burned closer to the house at the Archery Range but was surrounded by roads and clearings. I also saw that the fire had spotted over 100' away near the properties garage, and had spotted ahead of that also near the base of the hillside. The first spot was large but had a small road that it was about to bump and was backing towards the garage. The other spot was about 10' by 20' but doubled in size in the short time it took us to arrive on scene. Because of it's location at the base of the hill and it's potential I made the determination that catching the 2nd spot was our priority and spotted P72 on the right flank of the 2nd spot and E72 on the left. I reported 2 acres with multiple spots across the Archery Range road and took command. Porterville had named the incident as the Erskine fire and I gave a size up on SQF4 as well and advised that we would go unified as soon as a representative arrived on scene. It became apparent very early with the strong winds and abundant fuel that we were not going to catch the second spot and it became the main head going up the hillside. SQF 47 arrived on scene at this

Narratives

time and I had them secure an anchor and start a hose lay on the left flank of the fire. Crew 72 disengaged from the 2nd spot and layed hose to protect the garage from the backing fire of the 1st spot with help from SQF Engineer 47. I assigned E376 to assist with protecting the garage and personal property on the right flank of the fire and I assigned E371 to check and secure the structure near the origin and then start work on the right flank as well as this was the flank most likely to affect the nearest structure. At about this point I doubled the air tanker order and requested a Medium Task Force and Charlie Strike Team for the Lakeland and Oak Meadow areas. SQF Div 4 arrived on scene and we went into unified command. From this point on all orders that I requested went through Div 4 to Porterville dispatch and I handled the communications on Kern 3. SQF Engine 46 arrived on scene and Divisions A and Z were established with SQF Captain 47 as Alpha and SQF Captain 46 as Zulu. I updated that the fire was 200 acres and would hit the top of Cook peak shortly if it had not done so already. ECC reported that there was fire in the structures in Squirrel Valley. I asked for immediate need resources from the desert to respond and gathered all Kern County Fire resources minus E376 who was pumping the Zulu hose lay and responded to the Squirrel Valley area. Batt 7 advised to order 10 Bravo Strike Teams and I passed this along to Div 4 just before leaving. SQF Div 4 wrote the order on the white board at the ICP and I apologized for taking half of his resources, which were minimal to begin with, and I left in P-72. I made contact with Batt 7 on Erskine Creek Rd as he was approaching the incident and we did a quick face to face transfer of command. Batt 7 announced that he had taken Erskine IC and I became Company 72 again. When I arrived in Mt. Mesa I came across Batt 4 who had just been made Squirrel Structure Group and gave him a quick run down of the situation and what resources were currently in Squirrel Valley. I then went to where the fire was coming into the houses on Seclusion Rd and met up with Engine 72 who had gotten there 5 minutes previous. Engine 72 and Patrol 72 remained on the West side of Squirrel Valley for the remainder of the night protecting structures and extinguishing structures that were partially involved. At about 2200 we started a burn operation behind the houses on Bobcat as the fire was making a hard push towards the residents. This was successful and eliminated the threat of fire to the houses at the top of Squirrel Valley. At approximately 0200 on the 24th Engineer 72 advised me that he wasn't feeling quite right. FF72 started taking vitals and we conferred with Squirrel SG and the decision was made to have Engineer 72 transported to Bakersfield by ground ambulance. At this time Engineer (b) (6), (b) (7) (C) who we had picked up hours earlier became operator for E-72. At 0800 on the 24th Patrol and Engine 72 were assigned to Div Z and finally off the line at 1800 for R+R till 0600 on the 26th.

6/26- 6-29 assigned to the Kern Task Force until released at 2100 on 6/29. No significant events occurred during this time.

6/23/16

Arrived at ICP at est. 1830. I talked to the Unified IC's and asked if they needed my assistance. They wanted me to assist the OSC. I agreed, and we had a briefing of events. I suggested branching the fire with (b) (6), (b) (7) (C) staying as OSC. I would take a Branch. I would face to face with OSC and discuss how he would like to branch the fire.

1900 Hrs.

Arrived at my home to grab my vehicle. I made contact with (b) (6), (b) (7) (C) to let him know that I was on my way from Kernville. We decided to meet in the Bella Vista area.

1930-2400 EST.

Upon arrival found OSC and had a face to face brief. I was to take from Mt Mesa to the East. At this time the fire had burned through Squirrel Valley and was going through or was already through South Lake. We passed info about who was assigned to the groups and there TAC channels. I made contact with each of the groups and informed them that they now reported to Branch 1.

I made my way to South Lake and found South Lake Grp (SLG) He stated that there was power lines down everywhere and they were losing homes above Deer Brush and Goat Ranch. I told him to get the resources organized and pick up the edge on the South side of SL and start connecting the dots. The fire was spreading laterally along the slope in an Easterly direction. The fire was reaching Long Cyn and was reported to possibly spotted across. I told him I would get him the next set of dozers to start pushing line from South Lake to the East along the toe of the slope. I directed him to go as direct as possible but wanted the line to continue to Kelso Valley road.

Upon arriving in Mt Mesa made contact with (b) (6), (b) (7) (C), Squirrel STR Grp. He gave me a brief of events and resources. He was pushing dozer line along the top end of Squirrel Valley. He had fire all through the area and still laterally spreading in the community. I directed him to focus on connecting the dots house to house to stop the spread of the flanks. There was still fire moving around the East side of the valley and backing down on the West side of the valley in the lower section near Mt. Mesa. I also told him to focus on collecting the edge on the West side and direct it down to Hwy 178. I also reaffirmed that we did not want the fire South of hwy 178. There was some around the Kissack Ranch area that had crossed but would have to deal with that once the dozers were completed with their current assignment. The fire on the East side was backing towards additional structures. He did not have enough resources to try to go direct and stop that progression. I told him I suggested to allow it to back down to the roads and hold focus on holding the fire along the back of the str on the East side and North of Hwy 178.

I was also given Yankee Cyn with an additional ST9320C. I also assigned Horseshoe HS and Krn E476. The STL was made the str grp for that area. Upon arrival around 2000HRS found fire down and around Paradise cove restaurant and down to the road. There was a line of fire down the main ridge on the East side of the cyn. There was fire backing down off cook into Yankee and was going to impact the area within the next couple of hours. I had the crew look at options to collect the fire edge as it comes down into the cyn and take it back to hwy178. After I left the fire made a hard push into Yankee cyn with a wind shift. The resources used fire front follow to secure the strs and hold the fire on the hwy. I had Horseshoe bed down for the night around 0100 and to be available for the day shift.

6/24/2016 0001 to 0600 HRS

The fire continued to move with the wind south along Kelso Valley. The fire was actively

Narratives

backing of the ridge to the West in multiple areas. I had Kelso Str grp continue the dozer line along the toe of the slope in Kelso. The objective was to use the dozer line as a primary line and utilize Kelso Valley Rd and the creek bottom as a secondary line. The fire had progressed to the North side of Bob Rabbit Cyn (also known as Cortez) The rest of the Branch continued to have activity throughout the night. There was some structure/building loss due to the lack of resources to cover all areas of the fires edge that required attention. The fire did make a few short runs in the flats of Mt. Mesa, Paradise Cove, and Kelso Crk in the area of the Y.

6/24/2016 0600 HRS to 1900 HRS

The start of the next operational period had a weak response of resources coming into the fire to relieve the IA forces. The IA forces where required to double shift due to this reason. There was expected high winds and low RH's. Briefing was held at LI HQ. The morning was static with moderate fire behavior. The wind was light and variable. The fire was backing down the hill from Cortez north all along the Kelso Valley. Dozers continued to complete the indirect line along the toe of the slope. I had Fulton HS look at firing the dozer line while conditions were favorable. The rest of the resources monitored the fire progress off the mountain and scouted the area for concerns. Around 0900-1100 Fulton tried to connect cold black to cold black with the dozers and burnout small chunks. They had a couple of spots in the time frame and decided that with the increased winds and RH they would not be able to complete that mission. They monitored the fire and the small section that they had fired.

Around 1100 Hrs the fire activity gradually increased in different areas of Kelso Valley. The fire had also progressed to Kelso mtn and was backing down the mtn. I was informed that there was a potential for the fire to hit Bull Center in an hour time frame. I had two strike teams scout out the Bull Center area for structure defense if needed. At 1400 I took a RH of 12% north of Bull Center.

1410-1430

I returned to Pico and Kelso Valley Rd. The wind had increased and the fire came alive. It appeared that there was fire all through the Bob Rabbit Cyn. There was several reports of STR threat and a possible barn involved. During this time I headed N to get a better view when the fire ran across Kelso Valley rd and was well established on the East side of the road. I retreated from this area and notified OPS to close Kelso Valley rd to all South bound traffic. Upon heading back south fire also ran across the Kelso Valley Rd at Pico Rd. The fire jumped across the interection with ease. At this location was a Cal fire low boy that became involved and blocked the South escape. There was 5 addition vehicles that were trapped in this area. I instructed the engine and water tender to prepare to defend our location. I notified OPS and IC's of the burning agency vehicle at 1417hrs via KRN 3. 1500-1530 EST.

Sometime in this time frame we were able to leave the safe refuge area and head to the South. The fire was making a run to the east and finger was making a run straight to Bull Center. The resources were in place and talking to the residence to evacuate. I do not believe any residence choose to leave. The fire hit the first set of houses with a full head of steam. The fire was wind driven and there was no tactical opportunity to fire off around the houses. There was several house and debris piles on fire right of the bat. Crews worked in tight quarters to limit the structure loss.

1900 hrs EST

I was able to transition with the incoming DIVS and passed off the information. Night OSC from Team 5 assumed command.

I was called back into run Battalion 7. I got into the area and assisted TF5230 with scouting Hillview acres area for structure threat. After I went through that area, I met up with Operations (b) (6), (b) (7) (C) to link up with what he needed. He wanted me to go and scout the Kelso Valley area and the Bull Center area to scout for fire. I updated Operations with the fire status as it was entering into the Cortez Canyon area, and holding up along the ridge line. After Operations was able to copy my traffic, I had to break off to pick up equipment from the desert to help staff the battalion. I was exposed to structure fire smoke up in the southlake area, along in the Hillview acres area while scouting out potential for fire threat to the communities of these two areas.

June 23 - First operational period 1600 - 0600

I responded from a Cost Apportionment meeting at HQ. As I was leaving I heard the report of light smoke in the area. I advised the CalFire AREP that this is going to be a threat to the SRA and began my response. En route I notified B4 that I was coming from HQ. I caught up to B4 at the mouth of the canyon who allowed me to pass. Co72 arrived on scene and gave his size up of a couple acres, moderate rate of spread and spotting. Co72 went into unified command with USFS, taking KRN IC role. While I was responding the IC reported the fire now at 200 acres. I advised the IC to request 10 bravo (type 2) strike teams through Porterville. ECC was now reporting spot fires in the Squirrel Valley area. I asked the IC if he had resources that could respond to that area. E371 was sent over.

I met up with Co72 while driving up Erskine Creek. I made a face to face and took IC. I drove to the point of origin and met up with the USFS Div 4 and BLM BC 3115 to continue organizing the incident. SQF BC42 made Operations. We quickly realized we needed to move the command post to a better location. The CP was set up at the Park and Ride on Hwy 155 west of Hwy 178. Air Attack was reporting the fire at 300 acres. At this time structures were now being reported burning in the Squirrel Valley area. I sent B4 to Squirrel Valley to become the Squirrel Valley Structure Group. I requested an immediate need Type 2 strike team from KRN through Porterville and ECC. Resources from the TF ordered by Co72 prior to my arrival were coming on scene and I sent them to work for the Structure Group. I confirmed that the order for the 10 type 2 strike teams had not been placed so I made the request through Porterville. I advised ECC to start a MedAlert and recommended evacuating Kern Valley Hospital. I requested KCSO to begin evacuating the Lakeland Tract of Lake Isabella and Squirrel Valley. As the fire progressed I requested evacuations of all communities between Lake Isabella and Onyx along Hwy 178. Power line were being reported down so I requested SoCal Edison to cut power to the Squirrel Valley area. Within a few minutes I requested power to be shut down to Mountain Mesa and Southlake communities as well. With the rapid rate of spread I then requested Edison to shut down power to all communities along Hwy 178 between Lake Isabella and Onyx. We also placed orders for lunches to be at the fire at 2200. We began working on the complexity analysis and requested a Type 2 Incident Management Team to take the fire over. After a little discussion, it was decided to request a Type 1 Incident Management Team.

Cell service had been taken out by the fire. Radio traffic was becoming extremely congested so we began establishing more tactical channels and continued to use KRN 3 as a repeated tactical channel. The decision to continue to use KRN 3 was based on incoming resources unfamiliarity with the tone system of SQF4 and the poor reception we were getting from the area. The use of KRN 3 proved valuable throughout the duration of

Narratives

the incident with the poor reception from SQF4 in many areas.

As resources came in, they were put to work in the various divisions and groups. We made a total of 5 structure groups, 4 divisions and split the fire into 2 branches. B3B arrived on scene and was assigned as Branch 1. The fire was divided geographically to assist with span of control with Operations taking the west side and Branch 1 taking the east side. With Operations, we attempted to locate where we were going to be able to catch the fire. Fire was being reported cresting the hill above Kelso Valley. We estimated the fire at 5,500 acres based on distance and wind speed. Visibility was zero in most areas of the fire. Air Attack couldn't give an accurate size due to winds and smoke. Air resources couldn't be deployed on the east side due to winds. We estimated the fire to be long and narrow but set our perimeter based on the resources on scene, fire behavior, inability to use air resources and the hope for what was planned to come in. The big box was set at Hwy 178 to the north, Kelso Valley Rd to the east, Landers Meadow to the south and Keyesville to the west.

At 2230 we made the tough decision to bed down incoming resources to have a fresh day crew in the morning. 3 strike teams arrived after that point. We still anticipated many more to arrive by 0600. I was advised by the Duty Chief that Ventura and San Bernardino were both offering up strike teams if we needed. I advised that the requests had been placed through Porterville. The CalFire Rep, who had been on scene since about 1 hour after my arrival, advised that SoOps had not received and requests. I re-contacted Porterville to verify and was told the orders were UTF. I placed the orders again. At 0200 I was told by the OES chief, who had arrived on scene earlier, that the orders still had not been filled and that Expanded had closed for the night so they wouldn't be able to fill orders until 0600. I was also told that I had to specifically state "CFAA Approved" when I made the request or the order would not be made. The OES chief also advised that the orders that had been placed had a request time of 1800 on 6/24 instead of the 0600 time I requested. I placed the order again. Throughout the first 28 hours IA crews continued to stay engaged in active firefights in multiple areas. We estimated 150 - 200 homes lost and prepared for numerous injuries to civilians from the rapid rate of spread.

On June 24 - second / third operational period 0600 - 0600

We briefed the few new resources that arrived and put them to work on the line. Fire activity had slowed but was still relatively active. Fire intensity increased at 1000 and any chance to relieve IA resources was ended until we could get relief. At 1200 the unified IC's gave an in briefing to the oncoming management team. We requested they take the fire over as soon as possible. They advised they would take over the fire at 2000. Few of the resources requested had arrived but outstanding orders were showing filled with ETA's of 1800. We began to develop a plan to relieve the IA crews. At 1800, I briefed the 2 strike teams that had arrived. All resources still on the fire, but not part of the IA force, were assigned to work a 24 hour shift. At 2000 the IA resources were finally beginning to come off the line. The fire had progressed into Bull Center houses. Divisions were staffed lighter than desired but exhaustion and fatigue of the IA resources forced us to pull them back to rest. The Team IC took command of the fire and I went to meet with the resources who had just been relieved to advise them to be back on the line on June 26 at 0600 to meet the 2:1 work/rest ratio as best we could. I bedded down.

June 25 - July 3, 2016 - All operational periods reduced to 12 hour shifts starting at 0600 I was asked to stay on the fire at the Kern and Cal Fire IC and AREP. I was briefed by KRN C1 and the Tulare Ranger Unit Chief on their expectations. I tied in with the Team and assumed my responsibilities as Unified IC. We began working on a re-population

Incident Report

Narratives

plan. The fire did not consume homes in Yankee Canyon and on 1 in Mountain Mesa. We began with those areas. As we planned to open those areas, we were advised that there was a water issue that had to be addressed before we could open it back up. We were also advised that propane tanks would have to be inspected before allowing them to be used. We decided to delay the re-population another day to make sure it was safe to enter. Team personnel were assigned to liaison with the EOC to coordinate the plan. I was later advised that poor or lack of communication between the PIO and the EOC was causing significant disruptions in implementing the plan. I was asked by KRN C5 to be the point of contact. Cell service was still down and communication was difficult. I requested numerous times to have information and supplies taken to people across the evacuation lines and was advised by the Management Team that we could not do it for one reason or another. I contacted KRN PIO's and Logistics personnel, assigned to the incident, to get information out however they could and work with the engine companies to get whatever supplies we can. Water and ice were eventually being distributed to residents behind the closure. With my growing responsibilities and lack of sleep, I transitioned EOC liaison responsibilities to the Team Liaison Officer. Numerous public meetings were conducted and eventually, in coordination with the EOC, we were able to safely open the communities for re-population.

July 3 - 6, 2016 - Operational periods changed to 0800 - 0800

We transitioned from the Type 1 team to the Type 3 organization to manage the incident. I stayed on as unified IC for Kern and Cal Fire. The fire was now 90% contained. We were assigned 2 trainees and management of the fire continued without incident. On June 6 at 0800 we transitioned to a type 4 organization and I completed assignment.

I had requested a formal AAR but it needed to be cancelled due to other incident activity in the county and fatigue of the crews. The plan is to document what we can and perform the AAR in the upcoming weeks.

6/23/2016

Arrived at ICP and made face-to-face with IC(s). Assumed Incident SOFR. ~15 minutes after arrival I was asked to drive to South Lake to confirm spotting of the fire. Upon arrival in South Lake the fire had progressed into the neighborhood around Goat Ranch Rd. and had extended into structures.

I met with E74 and crew at James Store and received an evacuated resident from them who required assistance and ambulance transport to hospital due to immobility. I tended to the resident and passed care to Liberty Ambulance ALS crew upon their arrival.

I was then met by an evacuated resident who requested I go to his Goat Ranch home to retrieve his wife's chemotherapy medication. I drove to his residence and retrieved the medications. Upon departure from his residence I encountered a resident who was attempting to protect his structure with the fire front on the opposite side of the street. I asked the resident to get in my vehicle for evacuation and he complied. I then was flagged down by a resident who wanted me to assist her with retrieving her cats from her residence. With the conditions and limited time to safely evacuate, I refused her request and recommended she evacuate immediately. She refused and insisted help with her cats. I summoned East Structure Group (Co 71B - (b) (6), (b) (7) (C)) for assistance with the resident. He arrived and we were able to convince the resident to evacuate in her POV.

I drove the resident in my vehicle to James Store and dropped him off. I then delivered medications to the resident who requested them.

I then encountered a resident who required medical assistance due to smoke inhalation and requested an ambulance. I tended to the Pt until Liberty Ambulance ALS unit and crew arrived and passed Pt to them.

Narratives

I drove south on Goat Ranch Road and met with STEN 5205B (b) (6), (b) (7) (C) who had a disabled vehicle. We drove the neighborhood in my vehicle and assessed structure damage.

I fueled my vehicle at Station 71 and encountered two KCFD members who were experiencing ill effects due to smoke inhalation, exhaustion, etc. Along with other KCFD members, we made the decision to have the ill firefighters transferred to Kern Medical for further evaluation and Tx. Due to hard road closure of 178, H407 landed near Station 71 and flew the firefighters to Democrat LZ for rendezvous with Liberty Ambulance.

I traveled to Mt. Mesa and met with East Structure Group who had requested my assistance. There, I found another KCFD firefighter who was experiencing the same Sx and he was transported to Kern Medical via Liberty Ambulance.

For the remainder of the night I patrolled various neighborhoods in South Lake, Mt. Mesa and Squirrel Valley.

6/24/2016

At 0600 I attended briefing at ICP and was assigned to SOFR on Division Echo. I remained on Echo until approximately 1900 hours, at which time I was removed from the line and made my way to base camp for R&R.

6/25/2016

Demobed from the incident at 0900 and returned home, arriving at 1100.

Starting on 6/26/16 I reported to the EOC to assist with PIO duties reporting to lead PIO (b) (6), (b) (7) (C). I was task with starting the call center at EOC and assisting with maintaining the various media outlets (press releases, social media & phone calls) to assure accurate information was timely available.

6/28/16: I was assigned to assist with opening the "Transition Center" in Lake Isabella, that would allow local residence who were effected by the fire to come and ask questions.

6/29-30/16: Back to EOC assisting with PIO duties. Maintained reports showing call volume to the call center, which was utilized to adjust staffing & hours of operation for the call center.

7/1/16: Back to Lake Isabella to assist with opening the Local Assistance Center (LAC). I was the site PIO for the day. Did TV interviews with local news channels 17, 23 and Telemundo.

7/2/16: Back to EOC assisting with PIO duties. Demobbed from the Erskine fire at 2000.

Narratives

Received Dispatch Text at 1556 (Notification for PIO on 1st Alarm Wildland).

Listened to radio and on-scene size-up.

Posted first Incident Details at 1621 based upon size-up. Set-Up Text Alerts. Initiated Response. Upgraded to Code-3 Response when structures were threatened.

Arrived at 1720. Inciweb was in place at 1722 by BLM (b) (6), (b) (7) (C). Face-to-Face with IC. Updated Incident Details posted at 1729 with link to Inciweb. ReadyKern with evacuation order was issued at 1734.

Controlled Media near the ICP. Did stand-up interviews and several phone interviews. Allowed other Firefighters at the ICP to use my Verizon phone (no service for ATT).

1856 - Sent e-mail to all Kern, LA, and National media contacts. Provided (b) (6), (b) (7) (C)' phone number for info and phone interviews. Established me as on-scene media contact. PIO phone was un-forwarded at this time. Provided link to Inciweb. Provided local 2-1-1 number for Kern County residents.

1909 - Posted updates from the IC. 50-60 homes destroyed at this time. Media interest quickly growing regionally and nationally. Left (b) (6), (b) (7) (C) at ICP to control media. Advised Kern IC that I was en route to Squirrel/Southlake area to handle media in those locations. Made contact with media in the Squirrel area. Advised that I would give interviews at 10 PM at Dogwood and McCray. Made Face-to-Face with Squirrel Structure Group and advised I was entering his area.

1938 - Started Live Video Feed. Provided critical real-time information including current situation and evacuation orders. More than 1 million reached via social media. Estimated 500 million in indirect reach as nearly every network utilized the real-time video feed to pass along incident information.

2200-2310 - Interviews and Information Updates. 2239 - Uploaded 16 photos taken by (b) (6), (b) (7) (C) with link to inciweb. Photos were utilized by print and digital media sources.

2330 - Returned to ICP. Face to Face with Kern IC and Kern Fire Chief. Fire Chief requested 5 AM Press Conference.

0000 - 0430 - Returned to Squirrel/Southlake. Stand up interviews and phone interviews. Communicated face-to-face with persons in the evacuation zone. Located spot fires near structures and requested Structure Group resources to extinguish.

0430 - Set up Press Conference and MC'd. Provided live video feed of the conference.

0600 - 1200 - Provided more updates and interviews. (b) (6), (b) (7) (C) provided information at the Red Cross Evacuation Center and began to establish Traplines. 16 Traplines in all were established: Giant Sequoia Market, Sierra Gateway Market, Kernville Ranger Station, Wofford Heights USPS, Dollar General, Crossroads Shell, Coffee Mill Cafe, Lake Isabella

Incident Report

Narratives

Senior Center, True Value, VONS, Ace Hardware, Woodrow Wallace School, KCFD Station 72, Bodfish Post Office, Mountain Mesa Shell, Paul's Market (Weldon).

1200 - IMT in-brief.

1210 - Confirmed 2 fatalities (information approved by Unified IC's).

1530 - Wind event in Kelso Valley. Active fire front. Information and interviews.

1700 - Set up for 1800 Press Conference.

1800 - Press Conference - Speaker on behalf of Fire (Fire Chief on VIP tour with Congressman McCarthy). Streamed the Conference live.

2000 - IMT took over. Fell into the organization as a PIO-F Trainee. Assigned as Media Branch.

As part of the PIO shop under the IMT, I continued to go to briefings, do interviews, update social media, liaison between EOC information and Fire information, VIP tours for agencies and politicians, tour for Cal OES and FEMA, Transition Center and Local Assistance Center information and representation, Community Meetings, Evacuation Center and Trapline Information, and Donation information.

Narrative Text	Both Eng (b) (6), (b) (7) (C) and myself responded from our homes in Mt Mesa to station 71 and put P472 in service as P71 and responded to the Erskine Fire.

Initial Attack- 24 hrs approx 5-23

P71 met up with KB4C at Dogwood and McCray to assist with providing area maps and local knowledge. KB4C absorbed us in to the Squirrel Structure Group.

1st priority was to provide for life safety and evacuations. P71 attempted to lead SG to the seclusion area but it was quickly observed that the fire was spreading as a result of flaming embers raining from the sky. SG was relocated to an open lot to dispatch resources as needed.

P71 responded with SFTY 3 to (b) (6), (b) (7) (C) for a report of a non-ambulatory person trapped inside a burning building. As p71 was beginning to make entry a resident ran passed screaming someone's name. This individual ran in to the structure directly behind the one to believed to be inhabited. Crews followed the individual to remove him from the burning building. He said he was looking for his girlfriend who apparently had all ready evacuated. When questioned about a non ambulatory person he answered that his girlfriends grandmother lived in the front house. Crews repositioned again to attempt entry in to the structure. Crews were forced to abandon all attempt as the heat, flames and smoke had all ready consumed the interior or the structure causing the enviornment to no longer be survivable. An ansul and 2 sticks of hose were burnt in the rescue attempt. Structure Group was updated as to our actions. (A day or two later Structure Group was able to confirm that the grandmother had gotten out with the girlfriend)

P71 continued efforts to provide for life safety, evacuations, and fire mitigation when possible. We were in a Fire Front Following mode of operation which proved to be difficult as embers were eddying off of Cook Peak and seemed to rain down all around us. There was no "front" to follow.

P71 was able to engage and save at least the following residences as documenting addresses became progressively difficult. At times we were assisted by other engines and at times we were assisting other engine.

Narratives

that fire had all ready spread throughout the interior.

P71 continued in fire mitigation efforts throughout the night and on to the next day before being relieved at approx 1900 on 5-24

Crews bedded down for 24 hrs.

5-26/29

Absorbed in to KRN Task Force and assigned to West Structure group performing 12 hour work shifts. Crew assigned to work the areas of Mt Mesa, Squirrel Valley, and Southlake. Crews continued to mop up and do PR work as many of the residence were unaware of the evacuation order and were unable to leave during the fire fight having become trapped and now being feaful of reported looters were essentially left with no choice but to stay and protect thier properties. The team provided little to no information for us to provide to the public.

Before being disbanded the KRN Task Force recieved a de-briefing from KB7A. Many of the inital attack resources lived in the fire area.

Throughout the incident and especially during initial attack operations, crew was exposed to heat and smoke from various hazardous sources including but not limited to houses, vehicles, vegetation, sheds containing unknown chemicals, as well as fiberglass boats, and recreational vehicles.

O-245.2

Assigned to REM 52 with Capt. (b) (6), (b) (7) (C) and FEMP (b) (6), (b) (7) (C).

Made contact with fire Medical Unit leader to determine possible needs for the REM team within the fire. REM 52 was given the designator REM 1 and assigned to the whole fire to be used wherever needed. Med Unit Leader asked us to make contact with H408 and determine a medical and rescue plan as well as flight manifest REM crew and equipment.

REM team then triaged the fire area to determine possible future needs by locating crews within divisions and possible hazards of their assignments. During this time drills were conducted to simulate possible rescues that may occur.

The REM team continued to travel throughout the fire making contact with Branch Directors and staging in possible area where the team may be needed. Rescue drills were continuously preformed to simulate and prepare for possible rescues.

REM team was emergency demobed on 7/1/16 to cover station 52 during the Deer Fire.

Narrative Text	<p>I reported to station 71 from my home in southlake and put E71 in service. I responded to the Erskine fire in the Mt. Mesa area. I began doing structure protection on Dogwood Ave. I was then pulled in by Batt2 TF5230 where i continued structure protection on Dogwood and Poplar. Batt 2 requested me to scout out the Southlake area and report back.</p> <p>As I entered the Soutlake area I noticed a couple of homes starting to burn. I made my way to the top of Goat Ranch rd. where I made contact with KCSO and was informed of the many structures threatened and on fire.</p> <p>After my rapid recon of the area I reorted my findings to Batt2, and made my way down to my home on (b) (6), (b) (7) (C), where I evacuated my family as the fire front appoached my home from two sides. After they were safely evaced I began recon and structure protection of my neighborhood. As a single resource I was able to extiquish many fires on fences and bushes close to homes.</p> <p>TF5230 made there way to Southlake and again I tied in with them. we were able to construct line and stop the fires progression to the north of Goat Ranch and Entrada rd.</p> <p>I was later assigned to the north side of 178 and Ford st. for structure protection where I was able to pick up a spot fire with the help from locals. With Batt 2 I extiquished some guard rails along 178 and some power poles.</p> <p>Around 22:00 I went to station 71 for fuel. At this time things have slowed down and I noticed the beginings of a migraine and mild nausea. I was put on H407 and transported to Democrat helispot, transfered to ground ambulance, and transported to KMC for treatment of smoke inhalation. I was released the next morning and then cleared 3 days later to return to work.</p>

Narrative Text	IA Southlake Structure Group, East Structure Group (T), Division W (T) 6/23/16 1800 I reported to ICP with UT71. I was assigned as SouthLake Structure Group. No other

Narratives

resources assigned yet. Operations said as soon as the resources check in he would assign them to me. I went to station 71 to get my gear. The fire was just starting to advance into the Southlake tract. Upon arrival there were approximately a dozen structures fully involved and several spot fires in vegetation around structures, in yards, and vacant lots.

In the vicinity I found 3 engines engaged in fighting fire. I assigned them to structure protection on the west side of the tract near the intersection of Fiddleneck St. and Fremontia Way. As they protected those structures several others became fully involved to the East, North and South of their location, due to the high winds and advancing flame front. I gave Operations an update of the situation and asked the status of resources and to also include water tenders.

T/F 5230 and S/T 5205B were assigned to me and I instructed all resources to use a bump and run tactic. Several calls came in from ECC of people that were trapped in specific houses. I utilized resources from T/F 5230, S/T 5205B, Safety 2, and Safety 4, to check and evacuate those residence. Several people were taken to the Spirit Gas Station at the intersection of HWY 178 and Entrada Blvd. I ordered an ambulance to stage at this intersection to assess and treat patients for smoke inhalation.

Water tenders were assigned to me and I staged them at Station 71 and at the intersection of Entrada Blvd and Goat Ranch Rd. All units were advised of their location and other possible water sources. The water systems were failing or not able to keep up with the demand.

S/T 9411C and 2 Greyback engines 2 and 5 were assigned to me and I placed them in the Larsen tract for structure protection.

2100

Bat Chief 3B notified me that he was assigned as Branch 1. I gave him a briefing of my situation. He advised me of his plan to start picking up the edge. I told him we needed to anchor somewhere by the South Shore Estates Tract and Kissick Ranch. This is where the fire was North of Hwy 178, but I was unable to ascertain exactly where the fire was at. S/T 9222L was assigned and I had them find the fire edge north of Kissick Ranch and Bring Line to the South Shore Estates.

Kern Dozers and 9273G were assigned to me. I had them scout and construct Line from the Larsen tract to Hillview acres Tract and beyond that point towards Nichol Peak. 9273G would put handline in where the dozers could not. T/F Leader 5230 assisted with line location from the Larsen tract.

I requested Edison to respond for several powerlines down in the Southlake tract. Due to the powerlines down a few engines were stuck in the southern portion of the tract and were unable to get water due to the water system failing.

Crews worked throughout the night extinguishing spot fires and preventing structures from becoming involved, however several more structures were lost. I estimated over 150 homes lost total. Due to the amount of victims rescued and evacuated during the conflagration, I agreed with Operations decision to search the area with cadaver dogs.

6/24/16 0600

Incident Report
2016-1622831 -000

Printed: 10/07/2016 15:03:33
Number of Pages: 202

Narratives

I attended Briefing at 0600 and was assigned as East Structure Group (T). East Structure Group was responsible for all structures from the Southlake Tract, over 20 miles along Hwy 178 and down S Kelso Valley Rd to Bull Center. Due to limited relief, all IA resources were still assigned. I left S/T 9411C and Greyback Engines 2 and 5 to structure protection at the Southlake, Larsen and Hillview acres tract. I assigned T/F 5230 and S/T 5205B to protect structures on S Kelso Valley Rd. from Southfork Middle School to Bull Center.

1400

The fire became active just north of Cortez Canyon and pushed east/southeast toward Bull Center. The fire jumped S Kelso Valley Rd. After the flame front passed I worked with Supt. 5 Fulton HS and extinguished fire within several structures.

1600

Myself, East SG, T/F 5230 and S/T 5205B reassembled at Bull Center for structure protection. Due to the amount of debris and vegetation, several structures were lost however, because of firefighting efforts several structures were saved.

2000

I briefed with night Div. and all resources assigned to East Structure Group released and headed for camp.

6/25 through 6/27

Assigned as East Structure Group (T). East Structure Group was down sized to S Kelso Valley Rd, to Bull Center. Southlake, Larsen, and Hillview acres were turned over to Div E. I assigned all resources to structure protection and mop up around structures.

6/28 through 7/2

Assigned as Div W (T). This was a spike assignment. 5 hotshot crews assigned. All resources to construct handline from the W/Y break to the W/M break and secure all hot spots near the line. W/M break was later moved to Spike camp at Dry Meadow and increased the Div by about 2 miles. All handline was completed and hot spots were mitigated.

I was released at 2100 hours on 7/2

End of Report
